Governor Walker approves new box culvert, storm water pond

(Green Bay) As part of his efforts to create jobs and make sure Wisconsin is open for business, Governor Scott Walker recently signed an approximately \$6.9 million contract to divert a creek in the village of Howard and construct new storm water ponds and cul de sacs. The construction is part of the US 41 Project and is necessary for the future expansion of US 41.

General contractor for the project is Hoffman construction Company, Black River Falls, WI.

The Wisconsin Department of Transportation (WisDOT) northeast region project will construct a new box culvert for Beaver Dam Creek under a section of US 41, construct new Cul de Sacs at Island Court and Lone Grove Road, and construct a new storm water pond at Velp Avenue beginning Monday, April 1, 2013. The project is scheduled for completion in May of 2014.

The construction will require some night time lane closures along US 41.
